## KC TEACHER CO-AUTHORS \$109 "BESTSELLER"

Brad Hirni, North Kansas City high school world history teacher, is co-author of a unique "bestseller" that is shown, not read.

Along with Jack Traverse, who teaches at a junior college in New York, Hirni created a three volume series called "Western Civilization: Development, Rise and Ascendancy."

It consists of transparencies and overlays which are shown from overhead projectors. They use a combination of pictures and words to dramatize and pinpoint various theories and concepts. A correlation chart that can be used with all world history textbooks and a teachers guide accompany the series.

The three volumes are the result of three years' work and in spite of the \$109 price tag, are going into their third printing, having sold 4,000 copies to schools throughout the country.

## Sure I'll lend you a pencil!

Do you get upset when a child forgets to bring a pencil to class? Have you reprimanded students with the trite stories about the carpenter or doctor? How many pencils have you loaned and never seen again? Have you taught students to respond with anger when frustrated—as you were frustrated? Or, how many students' behavior have you reinforced by letting them show their fellow students that they can get you ruffled?

I have had a great deal of success with my practice of loaning pencils only with collateral. I never get upset. Never show anger. When a student forgets a pencil, I loan him a pencil. The only catch is that the student must put something up as collateral. A purse, shoe, belt, or some other article of value is put on par with the pencil. The pencil itself is usually of very poor quality, many times another student's castaway—a stub.

Not only does this procedure satisfy the student's immediate need for a pencil, but the student learns that he must return that pencil or face the consequences of losing his possession. It also illustrates the operation of a pawn shop to the poor who do not understand how their parents or brother lose many valuables. The student also learns not to expect any reinforcement from peers when he has to trade a shoe or belt for a stubby pencil discarded by another student.

Consequently, the student does not often forget his pencil! □
